Dear Sir/Madam

Budget Consultation Response
SPH42/SPH77 – Cuts to Non-Statutory Home to School Transport

I am writing to register my response to the Council's budget proposals for 2014/15, particularly in relation to the above suggestion to remove funding for non-statutory home to school transport for secondary school pupils.

I do not agree with this proposal.

I believe that cutting the funding that supports these bus services would have a huge detrimental impact upon the families that rely on these services to ensure that their children get to their school of choice safely, without having to negotiate, cross and walk along several very busy roads.

This proposal may also lead to parents having the worry of moving their children to other schools, having a huge impact upon their education, along with the effect this would have on numbers on roll within secondary schools.
